MAY 22-25, 2024, Thessaloniki, Greece

What was the best aspect of this event?

- Wonderful hospitality and kindness of the staff
- We all learned together
- The expertise of the speakers further reinforced my confidence.
- The generosity and spiritual positivity of the director and teaching and secretarian team
- FESS COURSE
- It is hard to say. I found the course intellectually stimulating and overall the presentations were highly informative and excellently delivered. Excellent choice of staff and presenters and topics covered all aspects of Rhinoplasty. However I found the cadaver dissection particularly fulfilling because it brought so many aspects of the procedure into focus and provided a clearer understanding of all of the various techniques.
- My supervisors were very well-educated and helpful.
- The best aspect of the course was the big amount of instruments and facilities.
- BOTH LECTURES AND CADAVER DISSECTION
- The cooperation and response to any request in addition to meeting with very kind and talented doctors. Thank you very much, please send me email for any future activities..
- The director was very kind and helpful even if a few specimen were not that appropriate for dissection. He also explained thoroughly the dissection steps. The social dinner was excellent
- The opportunity to learn from the best surgeons and to get their opinion on a lot of topics. Appreciating the human anatomy in the dissection courses. Meeting new colleagues.
- We had powered instruments
- Everything!
- The explanation step by step to the live monitor was very clear and helpful.
- Thumb up for the social dinner!
- Hands on equipment and specimens
- The best aspect was the quality of the lectures. It was exactly what I needed.
- the quality of the speakers
- Very positive faculty, easy to communicate with. Direct and hands on dissection-guidance. In general I found the faculty very easy going, nice people.
- The great lecturers, the attention to detail in the presentations and the time they spent with us during the dissections.
- The best aspects were as following: very good lecturers, well-prepared specimens and practical aspects of this course
- Everything was excellent! Amazing experience of learning new skills!
- Great opportunity to learn and very well organized
- The quality of the presentations! And the speakers invited. But I wish there was more time allocated for each of them because the subjects were really interesting.
- High level of presentations and discussions

- Every aspect of the course was well organized and well established
- Everything was perfect .lectures , educations .
- The best parts were the clear explanation of the operations, the quality of the equipment - respectively the neuronavigation and the powered instruments, and the fact that each participant had his own supervisor. The courses were informative and the quality of the information was good and useful in practice.
- Cadaver practice
- It was a pleasant experience with those very skilfull doctors
- Great lectures, great experience shared with attendees
- All aspects are very good but hope more progress.
- The dissection
- Dissections

MAY 22-25, 2024, Thessaloniki, Greece

What was the worst aspect of this event?

- None
- Was not any worst aspect of this event.
- Nil
- perhaps too much time was spent on the psychological aspects of the procedure and people seeking Rhinoplasty. That is for me. others may have felt they needed to hear it. Otherwise biggest complaint is that it had to end. a truly enjoyable experience.
- The quality of the specimen was not good enough for the rhinoplasty course.
- In the first day there were too many presentations
- Not enough time for dissection on specimen
- My cadaver didn't have cartilaginous septum for the rhinoplasty course. The cadaver for the FESS course didn't have one frontal sinus.
- If I must mention something, I would have preferred a more intermittent lecture/dissection. But this is merely a matter of preference, and I can't really say that this is a negative experience.
- The presentations although incredible and very interesting, were a little bit too many and at the end it was too much information to comprehend. But I want to say that overall I was very impressed and pleased with the course
- Nothing .everything was perfect
- theoretical part
- Some of lecturers are not more informative and it's better to bring more better lecturers in the future courses.
- The lecture venue was not comfortable enough

MAY 22-25, 2024, Thessaloniki, Greece

Would you apply for a similar course in the future?

- 38/45 of the people attended replied YES
- The rest of them did not answer

Comments & suggestions

- Just go ahead
- Keep up the good work
- I believe that the dissection on fess must be an entire day without the presentations at the end , in the afternoon. Just some cases and talk. The presentations should be confined in the first day and may be one or two at the beginning of the first day, before dissection
- I greatly appreciate and thanks of all great efforts given by the director and teaching team for the beautiful regulation and the scientific value of the course.
- During the cadaver dissection workshop I felt I had to go to other stations to get a better and more in depth teaching experience.
- CONGRATULATIONS FOR ORGANIZING SUCH AN EXCEPTIONAL CADAVER COURSE
- This experience left very beautiful memories in addition to the academic and academic benefit.
- Please make the Rhinoplasty training the last one in order to make the endoscopic Sinus dissection with preserved anatomy.
- Perhaps a distribution of lectures and dissection on both days and allow more time for hands on. Thank you
- Include one lecture with step-by-step analysis of the CT scan.
- Include a lecture with the dissection of the CRS with nasal polyps, preferably with video documentation.
- Thank you for receiving us, it was a pleasure to be part of this course.
- 1) Please give us access to the talks
- 2) A list of the equipment/instruments used and how to get them / suppliers
- 3) We made some friends so it would be nice to get a delegate and lecturer list for those that are willing to share their details. "
- A LITTLE MORE BREAK TIMES
- A little bit less lectures during the sessions in the FESS course. The ones in the Rhinoplasty were better managed.
- In the future I would like to have more time to practice on cadavers
- I would have preferred to do more lab/hands on and I think the FESS course should have been done before the septoplasty one.
- There should be more indicators to the venue, because in the first day it was really hard to find in the entire campus.

- I suggest that the first course should be the FESS course and then the rhinoplasty course to preserve the quality of the heads.
- Thank you for all
- "I would like to thank Dr. Janni and the Secretary of the course and all of the organizers for such nice course and hospitality.
- Best wishes"
